Biografie

Short introduction Agavni Jessaijan:

Make the impossible possible. If you really dare to believe that anything is possible. From her many years of experience as a consultant and organizational advisor, Agavni Jessaijan (we call her Raf) is equipped with enough inspiring material to make you think, to provide inspiration in any way possible, and to stimulate where it is really needed on the content of your change or the culture you want to be. You literally move.

Using Raf as a speaker or facilitator means customization, attention and going with all her heart for a cool session that people will talk

about for a long time. And everything is possible here too. Indicate what you need and you will get a lot of creative possibilities.

"As a leader, how do you take 100% ownership on the edge of chaos? For yourself. For your team. For your organization. For the world?"

Biography Agavni Jessaijan

Agavni Jessaijan [pronounced Arafnie] - started doing business at the age of 29. First as a financial and soon after that she was able to turn her passion for change and communication into her profession. She is an entrepreneur at heart. Owner of two companies and she is far from done. Her core business is creative change agency Heartcore-Lab, which specializes in organizational and cultural development, leadership training & coaching. Out of love for coffee and service, she founded her Specialty Coffee Bar Hummingbird Amsterdam in 2018.

Giving up is not in her DNA. Keep going is her mantra. "Everything is possible, but you have to dare to believe it" is her motto. She has also proven this during her participation in the popular Dutch tv-program Kamp van Koningsbrugge season 2, where she crossed the finish line as 1 of the 6 finalists and can call herself commando-worthy.

As an organizational consultant, she advises the corporate world on how to bring the heart back into the company and create a fertile culture for unprecedented opportunities. Her own development is not straightforward and because she has experienced all layers of organizations and has already (co-)rigged a number of companies - and demolished them again - she knows what you need to continue where others stop and especially in action must be taken on what is important.

As a Master Coach & Trainer in a fairly young coaching method called mBIT (Multiple Brains Integration Technique) she knows how to lead entrepreneurs, leaders and individuals from a

neuroscientific perspective to their most powerful selves. She teaches people to believe in themselves, to overcome their mental obstacles and to realize the life of their dreams. This way is the way of mBraining, working with your multiple brains - the heart, the head and the belly brain to reach ultimate wisdom.
