Biografie

Eric Edmeades is a serial entrepreneur and international business speaker, author. He was the host of a number of highly effective and transformational seminars, workshops and retreats around the world. His general philosophy is that life is important. And that we are meant to enjoy our short time here. With that in mind, he is now dedicated to working with entrepreneurs and business owners from all over the world to both inspire and empower them to achieve their full potential and to create truly exceptional lives for themselves, their families and their employees.
