Biografie

Linda Nazareth is an economist, a futurist, and a respected authority on the future of work. Her latest book is *Work Is Not a Place: Our Lives and Our Organizations in the Post-Jobs Economy*, a provocative look at the past, present and future of work that is sparking conversations about how we can prepare for the changes ahead.

As a speaker, Linda presents to audiences in fields ranging from education to finance to hospitality. The common thread though is her passion for her subject and her ability to make economic trends seem exciting, inviting and understandable to her audience.
