Questioning, talking about, discussing mans place in nature yesterday and today., Womens place in the world., Being a conservationist hunter.

Talen

SE, DNK, EN

Tijdslijn

2019

Merete van den Berg has written a book about Denmarks 107 "Pippi Girls." Together with queens and hugely important writers she has decided to include me as one of Denmarks inspiring and strong women in history.

2019

When I and my best friend filmmaker kire Godal won "best environmental film" at the Hollywood womens film festival.

2013

When I formed my foundation for elephants www.ivoryblack.com <https://vimeo.com/168550304>

2011

when I guided ten severely physically handicapped people across the stretch of Namibia (it became a hugely watched television

Biografie

I am a professional hunter guide in Tanzania, since almost a quarter of a century. I offer hunting safaris in some of the absolute top areas here. The vastness of these remote, completely wild and unfenced areas, are the key to a spectacular adventure. We only target carefully selected old males, which makes for a fair and sustainable chase.

We walk and track a lot. While the midday sun cools we eat our lunch and rest under a tree or by a river. By nightfall we are back in camp for a hot shower, drinks and dinner.

The hunting company

For many years I have had a working relationship with Robin Hurt safaris (Tanzania) and exclusively bring my hunting clients to their areas and old style canvassed camps. Camps of a style that has not changed much since the early 1900s. Here a smooth organisation, clear ethics, completely wild areas and warm staff blend into

East Africa. Member of the
African professional
hunters association

an ideal safari, for the intrepid hunter who loves nature and crave true adventures. With me you can hunt plains game and buffalo. My own passion as a professional hunter in Tanzania is to take a hunting guest on to the tracks of an old and gnarled buffalo bull. Hunting for buffalo in our western miombo forested areas means walking whilst following tracks. And when it comes to hunting buffalos in the northern Tanzanian mountains, you will need to get your walking shoes on, for here we cannot access anything but base camp with a vehicle. I also offer tailor made hunting safaris entirely on foot. This in the same areas, but fly camping and much in the simple and fancy-free style of the early explorers.

The hunting season in Tanzania is from 1st July to the end of December. My recommended top time for hunting buffalo is between the end of July and mid November.
