## Biografie

Remy Gieling is AI, ChatGPT and technology expert. He is an inspiring speaker and host on Digital Innovation. He is known from the Dutch radio and tv and is the founder of ai.nl. He is the author of several books, with his recent work being "Handbook AI Strategy" (published April 2024). As a tech watcher, Remy closely follows significant innovations and tools related to AI, adeptly interpreting their impact on businesses and employment. Together with Job van den Berg, he appears on national stages over 120 times a year.

Remy Gieling is co-founder of AI-software

company The Automation Group where they specialize in the integration of fine tuned large language models (LLMs) and advanced search technology (RAG) and AI Agents to automate tasks in large enterprises.

Furthermore, he conducts AI courses at institutions such as Nyenrode, is frequently featured as an expert in national media (including Nieuwsuur, Op1, RTLZ, BNR, SBS, EditieNL, Radio 1), and organizes AI-focused trips to Silicon Valley several times a year.
