Biografie

Bertrand Piccard is the initiator and visionary behind Solar Impulse, the very first airplane capable of flying perpetually without fuel. It is in his DNA to go beyond the obvious and achieve the impossible. As part of a legendary dynasty of explorers and scientists who conquered the heights and depths of our planet, he made history by accomplishing two firsts in aviation, circumnavigating the globe in a solar-powered airplane and before that non stop in a balloon. The ocean depths and the stratosphere attracted his father and grandfather; the challenges of our time fascinate him. With his dual identities as medical doctor and explorer, Bertrand has become an influential voice as a forward thinking leader for progress and sustainability

and a renowned
inspirational speaker. Following his pioneering
spirit in favor of the cause of renewable energies
and clean
technologies, he has now set off to select and
label 1000 solutions that protect the
environment in a profitable
way and will then embark on a third round-the-
world journey to deliver those solutions to
decision-makers,
encouraging them to adopt more ambitious
environmental targets and energy policies.
