#### Biografie

Milan Meyberg is the founder of Emissary of Gaia and winner of the:  
Marc Cornelissen Brightland Award [2023]  
Wubbo Ockels Innovation Challenge Award [2023]

Milan Meyberg is an Award winning visionary concept developer and strategist from the Netherlands who has dedicated his creative talents to creating a sustainable world. His unique mind has won him numerous awards and accolades in sustainability, circularity and events. Through his commitment to shifting paradigms, Milan is inspiring global audiences with his distinct vision of a symbioscene: a future

Wij zijn deelnemers aan de projecten van de  
Wereldbank en de UNDP. De projecten zijn  
opgestart onder de naam 'Ecopact'.  
internationale studieboek  
"Sustainable Event  
Management" (Meegan  
Jones - 3rd edition)

epoch wherein nature can speak with humans,  
and ecosystems are represented by  
Environmental AI (ENVAI).

Milan Meyberg's latest project: Right of Nature -  
What if the Ocean had a voice?  
Imagine a world in which nature has a voice. A  
world in which ecosystems are personified and  
can assist in solving climate problems. A world in  
which nature has rights and wherein  
environmental entities such as Forests, Rivers  
and Oceans speak through AI.

#### Biography Milan Meyberg

Milan Meyberg is an award winning  
Sustainability Strategist, Concept Developer and  
Public Speaker for global lifestyle brands, NGOs  
and large scale music festivals.

Milan was one of the first pioneers in the  
Netherlands to use festivals as living labs,  
directing the industry's vast creative and artistic  
talent to solve environmental problems. Most  
notably, he developed and implemented several  
revolutionary resource management concepts,  
zero-waste systems, and resource handling  
protocols to create the world's first circular  
festival (DGTL Festival in Amsterdam, 50.0000  
visitors).

In 2023, Milan has begun work on another  
world's first: the 'Emissary of GAIA' initiative. A  
groundbreaking Rights of Nature project to  
bring nature into the dialogue by providing  
environmental entities (such as Forests, Jungles,  
Rivers and Oceans) with the ability to speak  
through generative AI.

With the GAIA botnet, Milan is paving the way  
for a global network of Environmental Artificial  
Intelligence (ENVAI), enabling ecosystems to  
speak and to take part in the decision making  
processes of NGOs, businesses and governments.
