Biografie

Nadine Bongaerts is a synthetic biologist and a connector between science, society and business. She holds a bachelor and master degree in Life Sciences from the University of Leiden and TU Delft and is currently finalizing her PhD at INSERM and the Centre for Interdisciplinary Research in Paris where she searches for new tuberculosis antibiotics. Next to her scientific work, she serves as the Vice-President for Hello Tomorrow for science entrepreneurship and co-founded science communication agency Science Matters in 2011 and is a current faculty member for Singularity
