Biografie

Richard van Hooijdonk is a highly sought-after international futurist, trendwatcher, and keynote speaker who guides organizations into the world of tomorrow. Since 2014, he has delivered over 2,500 keynotes in more than 30 countries, inspiring over 600,000 people worldwide. His presentations are energetic, visually engaging, and always future-focused.

“AI, robots, and next-gen technologies are forcing us to adopt an entirely new mindset – it’s no longer about control, but about navigating uncertainty with intelligence.”
- Richard van Hooijdonk

As CEO of the Future Intelligence Agency

Trendforce.one, Richard van Hooijdonk leads an international research team specializing in emerging and disruptive technologies, including artificial intelligence (AI), robotics, quantum computing, biotech, and blockchain. Richard has authored over 2,000 articles, 60+ white papers, and several books on the impact of technology on work, life, and society.

His strength lies in translating complex technologies into accessible insights, combining them with current trends and strategic implications. He not only shows what's coming but also how to respond.

Richard van Hooijdonk is available for industry-specific talks (e.g. healthcare, education, government, finance, retail, construction, and agriculture) as well as broader keynotes on leadership, trends, work, and innovation.
